Fatigue, Tensile, and Relaxation Behavior of Stainless Steels

By J. B. Conway, R. H. Stentz, and J. T. Berling
Mar-Test Inc., Cincinnati, Ohio

This book contains a comprehensive discussion of fatigue, tensile, and relaxation behavior combined with a detailed summarization of data defining these properties for 304, 316, and 348 stainless steels. Methods of data analysis are covered in considerable depth. Prediction techniques are reviewed along with cumulative-damage and creep-fatigue interaction considerations.
